

## CHILDBIRTH IS UNIQUE TO EVERY WOMAN

Whether a normal or high-risk birth, Hines & Associates, Inc. nurse specialists share their knowledge of prenatal care through education, communication and compassion. Our comprehensive maternity management provides careful monitoring and indicates at-risk situations where Hines' BABE<sup>SM</sup> Critical Care would be appropriate.

### **BABE<sup>SM</sup> ADVOCACY BIRTH EDUCATION (BABE) MATERNITY MANAGEMENT**

Nurse specialists encourage mothers to pursue—and live—a healthy lifestyle. Mothers benefit from ongoing support, discussion and clinical input from a Hines Registered Nurse. Should complications arise, monitoring and intervention are pursued.

### **BABE<sup>SM</sup> CRITICAL CARE (BCC) NEONATAL CASE MANAGEMENT**

Essential to high-risk pregnancies, this comprehensive critical care/neonatal monitoring program provides continuity in care that begins at the onset of need and continues through post-hospital discharge for the infant. This program ensures evaluation by a Hines neonatologist, with input from medical staff, as well as overall coordination with a Hines' case manager specializing in critical care/neonatal babies.
